PREFACE.

It is gratifying to report that there is a substantial increase in the entries for this Volume, this increase being entirely confined to the Large Whites. The Foreign Trade has been very good, over 350 export certificates being granted during the year.

A few errors still creep in, mainly through the figures on the Entry Forms being indistinct. As the Entry Forms go to the Printers, it would be a great advantage if more care were taken in making them out, and that all should be written in ink.

Through the admirable arrangements made by the Printers the book will be in Members' hands some time earlier than last year, and the work reflects the greatest credit on the Firm and Staff for the way it has been done.
